Optional Management Software for E-MICRO-T, E-MICRO-TRHP, and E-1W.

- Intuitive graphical management software provides an easy-to-use, unified interface for both monitoring and configuring up to 3,000 E-MICRO-T, E-MICRO-TRHP, and E-1W units and all connected sensors via Ethernet.
- Units may be monitored and configured individually or in a group.
  - Changes can be pushed to all units in a group at once.
    - E.g. new users, mail server, network settings, security settings, system settings, etc.
- Display values and status for individual sensors or list of sensors.
- Scrolling sensor summary pages can include selected sensors from a specific unit, all units, or a pre-configured group of units.
  - Filter specific sensors from multiple units for close monitoring.
- Sensor history graph shows readings from up to the last 120 days.
- Client/server architecture
  - Server application actively polls all units for status information as well as listen for alerts from all units.
  - Client application communicates with the server to read statuses and to deploy configuration changes.
- Requires Java Runtime Environment 1.7 or later.
- NTI will provide customer, without charge, copies of any appropriate updates/enhancements for 12 months. This software update service is optionally extendable every twelve months for 20% of list price.
