SNMP and Web monitoring/management of server room environments. Provides early warnings before critical events turn into disaster.

Environment Monitoring
- Remote Temperature/Humidity Sensors over IP
- Temperature
- Humidity
- Water Leaks
- Air Flow
- Power
- Motion / Intrusion
- Vibration
- Smoke / Carbon Monoxide

Alert Notifications
- Email
- SNMP
- Webpage
- Voice Phone Calls
- SMS Messages
- Front Panel LEDs

Key Features
- Supports NTI’s advanced sensors which can be extended up to 1,000 feet using Cat5/5e/6 cable
  • Sensors are hot pluggable
- Monitor (ping) up to 64 IP network devices – alerts are sent if devices are not responding
- Sensor conditions (events) can be configured to trigger alerts by themselves, and/or be used in combination with other events to trigger Smart Alerts.
- Integrates with various Open Source monitoring packages – Nagios and MRTG
  • The unit can be polled via SNMP.
- Optional battery backup – alerts are sent when there is a power outage and when power returns
- Available with dual redundant power for connection to two separate power sources. (The second power supply is sold separately.)
- Available with optional 24VDC power.
  • Comes with a 24V DC-DC power converter built inside the unit.
- Optional industrial small environment monitoring system for high temperature environments. This industrial system has the ability to operate and monitor in harsh environments at high temperatures up to 167°F (75°C).
- Cascade up to 5 units via Ethernet connection (1 master, 4 slaves)
- USB ports for connecting USB modem or for downloading log data to USB flash drive
- Flexible Zero-RU mounting; optional DIN mounting or 1RU rack mount kit available
- Multi-language support – English, German, Chinese, and Japanese.
- Linux inside

The ENVIROMUX® Small Enterprise Environment Monitoring System monitors critical environmental conditions (such as temperature, humidity, and water leakage) that could destroy network components in your server room. When a sensor goes out of range of a configurable threshold, the system will notify you via email, SNMP traps, web-page alerts, a visual indicator (red LED), voice phone calls (via Automatic Voice Dialer System), and SMS messages (via USB 3G modem).

The system supports two external configurable sensors, five digital input sensors, and one output relay for control of external devices.
