

# Micro Environment Monitoring System / Remote Temperature/Humidity Sensor over IP

ENVIROMUX®

**Monitor and manage environmental and security conditions over IP. Provides early warnings before critical events turn into disaster.**

## Environment Monitoring

- Temperature
- Humidity
- Water Leaks
- Air Flow
- Power
- Motion / Intrusion
- Vibration
- Smoke / Carbon Monoxide

## Alert Notifications

- Email
- SNMP
- Web Page
- SMS

## Key Features

- E-MICRO-T
  - 1 integrated sensor – temperature
  - 2 RJ45 ports for external temperature/humidity sensors
  - 2 digital inputs sensitive to contact closure
  - Dual DC power provides dual redundancy.
- E-MICRO-TRHP
  - 2 integrated sensors – temperature, humidity
  - 2 RJ45 ports for external temperature/humidity sensors
  - 2 digital inputs sensitive to contact closure
  - Built-in Power over Ethernet (POE) and dual DC power provides triple redundancy.
- Sensors are hot pluggable.
- Monitor (ping) up to 4 IP network devices – alerts are sent if devices are not responding.
- Create multiple alerts for any installed sensor.
- Sensor conditions can be configured to trigger alerts by themselves, and/or be used in combination with other alerts to trigger one Smart Alert.
- Configure up to 32 alerts, and one Smart Alert.
- Alerts are posted in message log, which is accessible through Web user interface.
- Supports 4 IP network video cameras for live view of any facility.
- Integrates with various Open Source SNMP monitoring packages – Nagios.
- The unit can be polled via SNMP.
- Optional intuitive graphical management software provides an easy-to-use, unified interface for both monitoring and configuring up to 3,000 ENVIROMUX units and all connected sensors.
- Security: HTTPS, TLS v1.2, AES 256-bit encryption, 16-character username/password authentication, user account restricted access rights.
- Use in data centers, co-lo sites, web hosting facilities, telecom switching sites, POP sites, server closets, or any unmanned area that needs to be monitored.

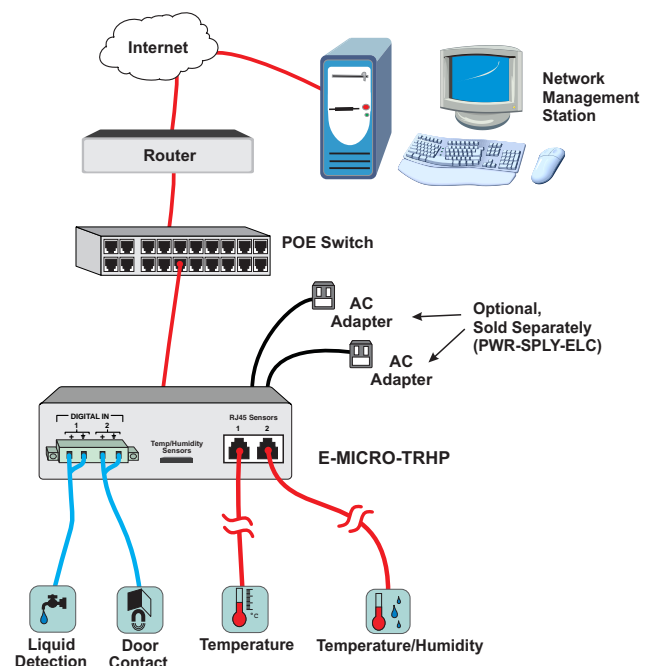

**E-MICRO-T**

- **Integrated temp-only or temp/humidity sensor, 2 temp/humidity ports, 2 digital inputs**
- **Power over Ethernet option**

The ENVIROMUX® Micro Environment Monitoring System monitors critical environmental conditions, such as temperature, humidity, liquid water presence, power, intrusion, and smoke. When a sensor goes out of range of a configurable threshold, the system will notify you via email, web page, network management (SNMP), and/or SMS messages (via email-to-SMS).

The system functions independently or as an IP-connected remote sensor for the E-2D/5D/16D. The E-MICRO-T features an integrated temperature sensor, two RJ45 sensor ports for external temperature/humidity sensors, and two dry contact inputs. The E-MICRO-TRHP features an integrated temperature/humidity sensor, two RJ45 sensor ports for external temperature/humidity sensors, two dry contact inputs and built-in Power over Ethernet (PoE).
