

ENVIROMUX-PST500 PRESSURE SENSOR TRANSMITTER INSTALLATION INSTRUCTION

The ENVIROMUX-PST500 Pressure Transmitter is ideal for OEMs with a 1% full scale accuracy sensor. The corrosion resistant 316L stainless steel wetted parts allow the transmitter to measure the pressure in a multitude of processes from hydraulic oils to chemicals.

FEATURES/BENEFITS

- NEMA 4X rated enclosure provides protection in harsh environments permitting outdoor monitoring or in areas where dust and particulate matter exists
- Robust 316 SS oil filled sensor provides shock and vibration resistance insuring stability in controlling pressure for process applications
- A wide range of models and connections that can meet pressure measurement specifications from low to very high. Contact an NTI product consultant for details.

APPLICATIONS

- Compressors
- Pumping systems
- Irrigation equipment
- Hydraulic
- Industrial process monitoring

Note: ENVIROMUX-PST500 requires installation in conjunction with ENVIROMUX-S5VDC Sensor Converter (sold separately)

Installation

- 1. Location:** Select a location where the temperature of the transmitter will be between 0 and 175°F (-18 to 79°C). Distance from the receiver is limited only by total loop resistance. The tubing or piping supplying pressure to the unit can be practically any length required but long lengths will increase response time slightly.
- 2. Position:** The transmitter is not position sensitive. However this unit was originally calibrated with the unit in a position with the pressure connection downward. Although it can be used at other angles, for best accuracy it is recommended that it be installed in the position calibrated at the factory.
- 3. Pressure Connection:** Use a small amount of plumber's tape or other suitable sealants to prevent leaks. Be sure the pressure passage inside the port is not blocked.

4. Electrical Connections

Wire Length -The maximum length of wire connecting the transmitter and voltage converter is a function of wire size and voltage converter resistance. Where wiring length is under 100 feet, wire as small as 22 AWG can be used.

Wire the ENVIROMUX-PST500 to the ENVIROMUX-S5VDC Voltage Sensor Adapter as shown in the diagram below.

WIRING TO ENVIROMUX-xD ENTERPRISE ENVIRONMENT MONITORING SYSTEM

5. Connection to ENVIROMUX-xD

Connect an 18-24AWG CAT5/5e/6 patch cable (up to 1,000 feet long) between the “Cat 5” port on the Voltage Sensor Adapter and an “RJ45 Sensor” port on the SYSTEM. (The use of smaller gauge CATx cabling will result in shorter distances that can be spanned.)

6. Web Interface Configuration in ENVIROMUX-xD

Configure the SYSTEM to react to changes in the voltage from the sensor, as desired. See example on page 2.

Sensor Settings	
Description	Pressure Sensor Transmitter Descriptive name for the sensor
Min. Level	0.0 Min. supported value for the sensor
Max. Level	5.0 Max. supported value for the sensor
Associate Sensor	<input checked="" type="checkbox"/> Associate sensor to a customized sensor type
Associated Sensor Type	Pressure Sensor Type of the associated sensor
Associated Sensor Unit	PSIG Measurement unit for the associated sensor
SNMP Associated Type ID	32767 ID value for SNMP type of associated sensor
Min. Associated Level	0.000000 Sensor expected value corresponding to 0V
Max. Associated Level	500 Sensor expected value corresponding to 5V
Min. Non-Critical Threshold	<input type="text"/> Min. threshold below which indicates an non-critical alert condition
Max. Non-Critical Threshold	<input type="text"/> Max. threshold above which indicates an non-critical alert condition
Min. Critical Threshold	<input type="text"/> Min. threshold below which indicates an alert condition
Max. Critical Threshold	<input type="text"/> Max. threshold above which indicates an alert condition
Refresh Rate	1 <input type="text"/> Sec <input type="button" value="v"/> The refresh rate at which the sensor view is updated

EXAMPLE OF SENSOR CONFIGURATION PAGE

For more on sensor configuration and alert settings, see manual 154 for the ENVIROMUX-xD Enterprise Environment Monitoring System.

SPECIFICATIONS

Pressure Range: 0-500 psig

Pressure Limits: Max. Pressure (psig) 1000; Max. Over Pressure (psig) 2500

Service: Compatible gases and liquids.

Wetted Materials: Type 316L SS.

Accuracy: 1.0% FS; 0.5% RSS

Temperature Limit: 0 to 200°F (-18 to 93°C).

Compensated Temperature Range: 0 to 175°F (-18 to 79°C).

Thermal Effect: ±0.02% FS/°F (includes zero and span).

Power Requirements: 10 to 30 VDC

Output Signal: 0 to 5 VDC

Response Time: 300 ms.

Loop Resistance: 5K Ohms

Stability: 1.0% FS/year (Typ.).

Current Consumption: 10 mA maximum

Electrical Connections: Cable gland with 3' of prewired cable

Process Connection: 1/2" male NPT

Enclosure Rating: NEMA 4X (IP66).

Mounting Orientation: Mount in any position.

Weight: 10 oz (283 g).

Agency Approvals: CE.
