

Control two PCs with one keyboard, monitor and mouse

- Control all network computers from one office.
- Auto scan all computers to catch system failures early.
- Improve manageability of your computer room – eliminate extra cables, monitors, keyboards and mice.
- Compatible with IntelliMouse®.
- Broadcast keystrokes to all computers for simultaneous shut-downs.

KEEMUX-PS2 (Front & Back)

The KEEMUX™ PS/2 KVM switch allows one keyboard, monitor and mouse to control two PCs. Dedicated internal microprocessors emulate keyboard and mouse presence to each attached PC 100% of the time so both computers boot error free.

Specifications

Hosts

- Female 15-pin HD and female 6-pin miniDIN connectors.
- Compatible with all PS/2-style PCs and laptops, HP9000, Silicon Graphics and IBM RS6000 workstations.
- Compatible with SUN Fire V20z.
- Multiplatform support: Windows 7/8/10/11, Windows Server 2008/2012/2016/2019/2022, Linux, and FreeBSD.

Monitor

- Female 15 pin HD connectors.
- Supports 1920x1200 resolution with no degradation.
- Bandwidth is 150 MHz.

Mouse

- Female 6-pin miniDIN connectors.
- Compatible with all standard 2-button PS/2 mice as well as the following:
 - Alps Glidepoint Touchpad – extended functions (i.e. tapping, etc.) are not supported.

Control Methods

Front Panel Interface

- Touch a button and be connected to a CPU or change modes of operation.
- LEDs indicate currently selected port and mode of operation.
- Hold in any button for more than two seconds to go into **Scan Mode**, **Broadcast Mode** or **Command Mode**.
 - **Normal Operating Mode**, the user can directly operate the selected computer with transparent presence of the NTI switch.
 - **Scan Mode** feature causes the switch to automatically and sequentially display the video from each powered on computer for 2-255 seconds.
 - **Broadcast Mode** feature allows the user's keystrokes to be sent to all powered on computers.
 - **Command Mode** allows the user to give instructions to the switch through their keyboard. Keystrokes are not passed to the computer.

Keyboard

- Type <CTRL> + <~> to go into **Command Mode**. (“`” is the accent mark located on the same key as the tilde “~”)
- Press ESCAPE to leave **Command Mode** and return to **Normal Mode**
- **Scan Mode**, **Broadcast Mode** or **Command Modes** are available from the keyboard.
