# Micro Environment Monitoring System Android App

ENVIROMUX®

Use an Android tablet/phone to monitor sensors connected to ENVIROMUX-MICRO units and acknowledge/dismiss alarms.

Optional Tablet/Phone Android App for ENVIROMUX-MICRO.

- Intuitive application software provides an easy-to-use interface for monitoring and displaying sensor statuses from an unlimited number of ENVIROMUX-MICRO units.
  - Requires tablet or phone with Android 4.11 (Jelly Bean) or later operating system and ENVIROMUX-MICRO-T(RHP) unit with firmware version 3.2 or later.
  - Network connection type is dependent on tablet/phone features (WIFI/3G/4G etc.).
- Use to view real-time sensor values and acknowledge/dismiss alarm statuses of sensors/digital inputs/IP devices outside of the remote location.
  - Sensor value and alert status pages feature large fonts for viewing from a distance.
  - Display individual or group sensor values at a configurable scan rate - updated in real time.
- Features 8 customizable dashboards - choose which ENVIROMUX-MICRO units and sensors are added to each dashboard.
- Configure ENVIROMUX-MICRO unit names, network settings, display options, sensor display scan times, and sensor refresh rates in the app.
