Units may be monitored individually or in a group.

Display values and status for individual sensors or list of sensors.

Self-hosted software – ideal for users in industries that require local software management solutions for security or data privacy purposes.
- Install on a Windows-based server or computer.
  - Virtual machines are NOT supported at this time.

Any computer, smartphone, and/or tablet with a web browser installed can be used to access the software.
- Access is operating system independent through the HTML5 user interface on the computer/smartphone/tablet’s web browser.
- No clients or special apps to install.

Supports 1,000 users accessing the software program at the same time.
- Users can configure their own dashboards to display the data relevant to them and the window arrangement.
  - Customize dashboards to display unit status, sensor data, gauges, graphs, and IP camera snapshots.

Configure pre-loaded geographical maps or upload custom floor plan maps/images for a visual representation of sensor locations.
- Provides users with a real-time view of their facility, and the physical location and status of all connected ENVIROMUX environment monitoring systems and sensors.

Schedule and customize PDF reports that can be viewed/saved in the software and emailed to selected users.
- Saves up to 1,000 user-programmable IP camera recordings.
  - Any programmed event can trigger a recording from an IP camera.
  - Recordings are created using snapshots captured based on the refresh rate set for the IP camera.
  - Recording duration can be set between 5 seconds and 10 minutes.
  - Each recording is labeled with the name of the camera the images are captured from with the date/time.

One-time purchase – no monthly fees.

NTI will provide customer, without charge, copies of any appropriate updates/enhancements for 12 months. This software update service is optionally extendable every twelve months for 20% of list price.
- Features coming soon in upcoming releases:
  - Full HTTPS support with auto host-name update and certificate generation.
  - Support for IP sensors on E-xD.
  - Support for E-MICRO and E-1W monitoring systems.
  - Support for live stream video from IP cameras.
  - Support for running the software as a Windows service.
  - Auto discovery of NTI devices from server.
  - Download data logs.
  - Support for auto load of E-xD configuration when changes are made directly on E-xD unit.
  - Email alerts from the software.
  - Push notifications from browser on Android and iPhone smartphones/tablets.
  - Plot the placement of E-LLDC-xx Liquid Location Detection Sensor Cables on floor plan maps to visually see the specific location of liquid presence when detected.

Optional Management Software for E-2D/5D/16D.

E-MNG-SH is a self-hosted software program that provides an easy-to-use, unified interface for monitoring and configuring up to 3,000 E-2D/5D/16D units and all connected sensors (internal, external, and digital input) and output relays via Ethernet. The software is installed on a Windows-based server or computer to actively poll all units for status information and alerts. Any computer, smartphone, or tablet with a web browser can be used to access the software. It allows users to be kept up to date on sensor statuses and be alerted instantly when a sensor goes out of range of a configurable threshold.
