Self-Hosted Management Software for Enterprise Environment Monitoring Systems

- Units may be monitored individually or in a group.
- Display values and status for individual sensors or list of sensors.
- Self-hosted software – ideal for users in industries that require local software management solutions for security or data privacy purposes.
  - Install on a Windows-based server or computer.
  - Virtual machines are NOT supported at this time.
- Any computer, smartphone, and/or tablet with a web browser installed can be used to access the software.
  - Access is operating system independent through the HTML5 user interface on the computer/smartphone/tablet’s web browser.
  - No clients or special apps to install.
- Supports 1,000 users accessing the software program at the same time.
  - Users can configure their own dashboards to display the data relevant to them and the window arrangement.
  - Customize dashboards to display unit status, sensor data, gauges, graphs, and IP camera snapshots.
- NTI will provide customer, without charge, copies of any appropriate updates/enhancements for 12 months. This software update service is optionally extendable every twelve months for 20% of list price.
  - Features coming soon in upcoming releases:
    - Full HTTPS support with auto host-name update and certificate generation.
    - Support for geographical and floor plan maps.
    - Support for IP sensors on E-xD.
    - Support for E-MICRO and E-1W monitoring systems.
    - Support for live stream video and recording videos from IP cameras.
    - Support for running the software as a Windows service.
    - Auto discovery of NTI devices from server.
    - Download data logs.
    - Support for auto load of E-xD configuration when changes are made directly on E-xD unit.
    - Email alerts from the software.
    - Report scheduling and generating PDF reports.
    - Push notifications from browser on Android and iPhone smartphones/tablets.

E-MNG-SH
Self-Hosted Enterprise Environment Monitoring System Management Software

- Self-hosted software.
- No clients or special apps to install.
- Access from anywhere using a web browser on a computer, smartphone, &/or tablet.
- Monitor & configure up to 3,000 units & all connected sensors.
- Display values and status for individual or list of sensors.
- Customizable monitoring and layout for each user.

Optional Management Software for E-2D/5D/16D.

E-MNG-SH is a self-hosted software program that provides an easy-to-use, unified interface for monitoring and configuring up to 3,000 E-2D/5D/16D units and all connected sensors (internal, external, and digital input) and output relays via Ethernet. The software is installed on a Windows-based server or computer to actively poll all units for status information and alerts. Any computer, smartphone, or tablet with a web browser can be used to access the software. It allows users to be kept up to date on sensor statuses and be alerted instantly when a sensor goes out of range of a configurable threshold.
