TROUBLESHOOTING

Problem: There is no output on the screen when all connections are correct.

Answer: 1) Make sure the HDMI cables support 4Kx2K (if the output signal from the source device is 4Kx2K resolution).

- 2) Make sure the CAT6/6a/7 cable is inserted into the RJ45 port well.
- 3) Restart the Transmitter and/or Receiver by pressing the RESET button on each.

Problem: The display/monitor has a black screen (no image)

Answer: 1) Verify the CAT6/6a/7 cable length is within the specified range (maximum 230 ft. (70m)).

2) Restart the Transmitter and/or Receiver by pressing the RESET button on each to re-build the connection.

Problem: The display shows unusual color or no sound

Answer: 1) Restart the Transmitter and/or Receiver by pressing the RESET button on each to re-build the connection.

- 2) Verify that the HDMI cables are well connected.
- 3) Make sure the CAT6/6a/7 cable is inserted into the RJ45 port well.
